

A **LIQUIGUARD**® Product  
*protection without pollution*

**SolidStepCote** represents the most advanced technology available on the market today in non-slip floor coatings. It is an entirely GREEN, water-based solution that dries crystal clear and creates an invisible anti-skid finish. It creates a lasting bond with practically any surface and reduces the need for regular waxing, buffing and other costly maintenance procedures. **SolidStepCote** does not attract dirt, creates a protective barrier against stains and spills, and prevents grout from soiling and discoloration. Cleaning simply requires a mild detergent, or soap and water.

**SolidStepCote** is the best line of defense against slip and fall accidents. It is extremely durable and is designed to be used in demanding indoor and outdoor environments such as:

**Factories**  
**Warehouses**  
**Hospitals/Nursing Homes/Retirement Communities**  
**Hotels/Motels/Condominiums**  
**Grocery Stores/Kitchens/Fast Food Establishments**  
**Schools/Colleges/Dormitories**  
**Offices/Workshops/Laboratories**  
**Auto Dealerships/Repair Shops**

**Boat Decks**  
**Pool Decks**  
**Steps**  
**Patios**  
**Foyers**  
**Bathrooms (including bath tubs and shower stalls)**  
**Loading Docks/Ramps**

*The Final Step in Floor Safety*

**SolidStepCote** eliminates the need for non-skid strips, surface etchings, rubber mats and toxic epoxy-based coatings. It works just as well on stone as vinyl composite tile (VCT) and has been enhanced with additives that *provide UV protection and prevent the growth of mold and mildew*. It does not deface the underlying surface and can be removed with the use of Liquiguard's proprietary cleaner.

**SolidStepCote** is safe and easy to apply by brush, roller (short nap) or low pressure air spray. One gallon will protect approximately 350 square feet, depending upon the type of surface. It dries quickly and easily and there are no harsh chemicals or toxic fumes associated with the liquid material or cured film. Depending up on the amount of foot traffic where **SolidStepCote** is applied, it should last one to several years before needing reapplication.

**SolidStepCote** can be applied to most everyday surfaces including *concrete, pavers, fiberglass, glass, granite, marble, metal, plastic, vinyl, porcelain, slate, ceramic tiles and wood*. It is available in various degrees of coarseness depending upon the level of slip protection needed. It is normally offered as a clear solution but can be special ordered in various safety colors such as yellow, orange and ADA blue.
