

## Protect hands from door handle germs

## Less Contact, improved hygiene.

Introducing a new way to make the restroom experience less hands-on. The Tork® Elevation Folded Tissue Dispenser and 5-liter Bin work together to create the DoorMate™—a system that protects hands from door handle germs. One less surface to touch means less contact, less germs, less illness. **Just one less thing to worry about.**

### Fewer germs

The Tork Elevation DoorMate prevents hands from touching door handles, which protects against the spread of germs. No-touch dispensing keeps hands cleaner.

### Less waste and mess

Providing a small square of paper for guests to use when opening the door plus a bin to discard it in prevents them from using a paper towel, leaving waste on the floor.

### Small footprint

The slim, coreless design takes up less space and fits anywhere. 100% recycled means lower impact on the environment.

### Less maintenance

Smooth, simple dispensers are easy to install, refill and clean. Seamless design means one less groove for dirt to hide.

### One clean look

Every product in the Tork Elevation family is designed to complement your space—and each other.
