There are 3 factors to consider when choosing the correct floor pad in your UHS SYSTEM.

1. Type of Finish

Harder "Dry Brite" finishes will respond well to UHS pads with a blend of synthetic and natural hair. Softer finishes typically respond better with 100% synthetic or a light hair blend.

2. Type of Equipment

- **Electric** - lowest brush pressure and least aggressive.
- **Battery** - higher brush pressure and more aggressive.
- **Propane** - highest brush pressure and can be most aggressive

3. Frequency

Typically, but also dependent on finish hardness, the more frequent you burnish, the softer the UHS pad.
