## Tork® Products are Third-Party Verified

SCA offers a range of Tork products that are certified by **EcoLogo™**, **Green Seal™** and the **Biodegradable Products Institute™ (BPI)**. All Tork paper towel and napkin products have been verified compostable by an independent commercial composting company's standards.

The EcoLogo Program is North America's largest eco-labeling program offering the most comprehensive and stringent criteria for green certification. Green Seal is an independent non-profit organization dedicated to safeguarding the environment and transforming the marketplace by promoting the manufacture, purchase, and use of environmentally responsible products and services. Compostability testing reviews the materials to ensure they will properly break down in the commercial composting process. These independent reviews provide greater focus on the transparency of the product lifecycle.

### Why is Third-Party Verification important?

You wouldn't trust a non-certified individual to inspect your home or car before buying – why should purchasing paper products be any different? Third-party verification provides objective assurance that our facilities, processes and products meet or exceed criteria for environmental standards.

You can focus on selling your value and services.
